### Overview

[THUNDERBOLT TECHNOLOGY All you need to know.](#)

## BRIDGE THE GAP

With speeds of 40 Gbps, the Thunderbolt 3 Express Dock HD has twice the speed of Thunderbolt 2 (20 Gbps) and is 8x faster than USB 3.0 (5 Gbps). That means you can transfer a 4K movie in under 30 seconds! Our dock provides up to 85W of power to your computer which allows you to power your computer & connect to all your peripherals with a single cable. Have more than one 4K display? This dock supports dual 4K displays (DisplayPort and Thunderbolt 3 USB-C) for the ultimate monitor experience. Thunderbolt 3 merges performance and simplicity making the Thunderbolt 3 Express Dock HD the true all-in-one docking solution.

## KEY FEATURES

1. Gigabit Ethernet
2. Audio Out
3. 2x USB-A 3.0
4. 2x Thunderbolt 3 (USB-C)
5. DisplayPort
6. Power
7. Connection Status
8. USB-A 3.0
9. Audio Out

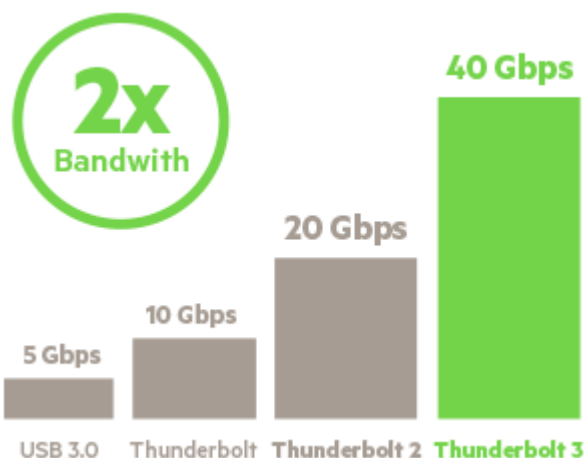

*"Powerful. Fast. Ships with a cable...[D]rives dual displays. Charges your computer with plenty of power remaining for peripherals... I love it and cannot recommend it highly enough." --Gear Diary editor Dan Cohen*

## POWER HITTER

The Thunderbolt 3 Express Dock HD has some serious power. Delivering 85W of power upstream to your computer means you'll never need an extra power supply.

## NO SPEED LIMIT

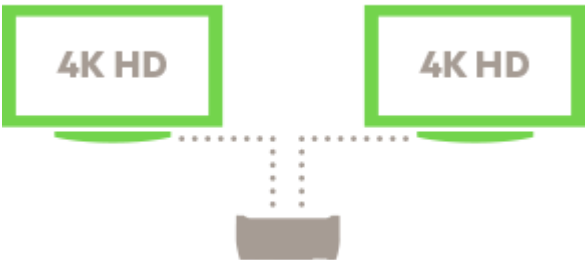

40 Gbps data transfer rates is fast enough for whatever you plug in. You'll maintain full speed even when fully loaded and running multiple peripherals at once. You can transfer 3 hours of 4K action camera footage in less than a minute.

That's 8x faster than USB 3.0. With the Belkin Thunderbolt 3 Express Dock HD, your need for speed has been satisfied.

## ONE DOCK, ONE CABLE, ONE LOVE

Connect and power with a single cable. Now, one compact port provides Thunderbolt 3 data transfer rates and optimum notebook charging with a single cable. Daisy chain up to 5 additional Thunderbolt devices from the dock. Compatible with Thunderbolt 3 (USB-C) enabled Mac running Mac OS Sierra or later. Please note that the Thunderbolt 3 Express Dock HD is not PC compatible.

## DUAL 4K VIDEO OUTPUT

For a more immersive experience with life-like detail and rich, vivid colors, the Thunderbolt 3 Express Dock HD supports dual 4K displays, from both the DisplayPort™ and the Thunderbolt™3 ports. (Compatible with USB-C video adapters such as HDMI, VGA, etc.)

Technology	Max Speed	Max Power Output	Connector Type
Thunderbolt	10 Gbps	10 W	Mini Displayport
Thunderbolt 2	20 Gbps	10 W	Mini Displayport
Thunderbolt 3	40 Gbps	100 W	USB-C

At A Glance:

- Connect 8 separate devices through a single Thunderbolt cable
- True single-cable docking solution
- Dual 4K video output (Display Port, Thunderbolt 3 (USB-C))
- Included 170W power adapter (included) provides enough power to support attached peripherals while delivering up to 85W of power to your computer through the Thunderbolt 3 cable (included)
- Daisy chain up to 5 Thunderbolt devices from the dock

Package Includes:

- Belkin Thunderbolt 3 Express Dock HD
- 3.3-foot / 1-meter Belkin Thunderbolt 3 Cable
- Power Adapter

Please note: Promotion codes, coupons and other discounts do not apply to the Thunderbolt Dock 3.

Features

- Connect 8 separate devices through a single Thunderbolt cable
- True single-cable docking solution
- Dual 4K video output (Display Port, Thunderbolt 3 (USB-C))
- 85W PD powers your computer through 3.3-foot / 1-meter Thunderbolt 3 40Gbps cable
- Daisy chain up to 5 Thunderbolt devices from the dock

★ Featured

Works great!

So far every feature of this device has been working great. Docking and undocking everyday with my 15" MBP has been seamless.

Quality

I am even using a crazy chain from TB3 -> TB2 adapter -> Ultrawide (3440 x 1440) monitor -> onboard USB ports -> USB 3.0 hub. And everything along that chain works great.

✓ VERIFIED PURCHASER

Works well: drives my HP ZR30w over display port

Very nice. I come into the office and plug in one Thunderbolt 3 cable, and I have my power, display and peripherals. Couldn't be happier.

Good, but far from perfect

Graphics, networking and sounds work without problems. However, I have an external USB disk attached to the dock. When I disconnect the dock from the laptop (after properly ejecting the HDD in Mac OS), the hard disk spins up again, even if there is no laptop connected. Hardly the intended behaviour, in particular not for a EUR 350 dock.

### Response from Belkin:

Belkin · Customer Support · a month ago

Hi, nilsifumol,

Your feedback is greatly appreciated. The behavior that you observed is normal since the Thunderbolt 3 Express Dock supports ghost charging. The dock will still provide power to all the USB ports as long as the dock is plugged into the power supply unit, even without a MAC machine connected to the dock. Should you have queries or clarifications, feel free to contact us anytime at BelkinCares@belkin.com.

Regards,

Jay Belkin Support

fall down in the last mile

its a good device and it definitely does what it was promised to do, which is a good thing (so many things we buy - at a premium- this day don't) but if I had defined the thing I would have added 3 more things: 1. a bracket to mount it under a desk or a wall (no problem, me and my Wonderfull 3D printer are making one) 2. an SD card reader, I mean come on! really? if you are going to give us what Apple took away tat give it to us. 3. A thunderbolt 2/1 connector (read the comment on number two)

Quality

Performance

Ease of Use

if the next version has the 3 or 2 missing items it will then be perfect... if anyone is interested in the mounting bracket text me:) I'm still going to give it full marks as it does what its supposed to do.

No Issues either

Unlike other buyers, I have no problems using this dock. The performance is way more better than an adapter.

I have no issues like other buyers

I received the dock today and hooked up to 2 4K60 display: Dell P2715Q (via usb-c to displayport cable) ASUS PB287Q (via DP cable)

Quality

Also add the following: Ethernet connection USB->HDMI dongle (displaylink chipset for 3rd video output projector) USB->external DAC USB->iPhone

Performance

Ease of Use

Everything seems to be working fine, no blur, shutter, confirmed native 4K @60Hz from my MBP 13" TB

doesn't work as advertised

just unboxed. connected two LG 4k monitors. one to the type c port and one to the displayport. monitor connected to the displayport does not work. i contacted support, no help. web site, no help. in fact, the web site suggested i try trial and error but did not give any useful help.

JohnRambo · 2 days ago

1  
answer

Hi. Can you please let me know if this will support dual 4k monitors with Windows 10 running on a 2017 mbp. Thanks

Answer this Question

Belkin Support · 20 hours ago

No, JohnRambo. The dock is only designed to work with MacBook Pro (2016) that is running on MacOS Sierra.

Helpful? Yes · 0 | No · 0 Report

Flanman · 5 days ago

I read that this dock supports dual 4K monitors and a 5K monitor. I am un clear if it will support 2 LG ULTRA FINE 5K 27" monitors hooked up to my MacBook Pro. If so, how are the connections made?

1  
answer

Answer this Question

Belkin Support · 3 days ago

Hi, Flanman. The Belkin Thunderbolt 3 Express Dock (F4U095) only supports single 5K display.

Helpful? Yes · 0 | No · 0 Report

JoshH · 4 days ago

regarding dual monitor configuration: I have 2 Dell P2415Q monitors, neither of which have native thunderbolt 3 ports. Would I be able to plug both monitors into the dock to get dual display output or would 1 of the 2 have to be plugged into my MacBook?

1  
answer

Answer this Question

Belkin Support · 3 days ago

Hi, JoshH. It appears that your Dell P2415Q monitors support HDMI and a DisplayPort connection. You have the option to use a Thunderbolt 3 (USB-C) to HDMI adapter for the first monitor. While the second monitor will be connected to the DisplayPort of the dock.

Bert · 10 days ago

Hi, can i connect my older EIZO display with Display port only using the Thunderbolt™ 3 Express Dock HD on a new iMac 2017 using one of it's Thunderbolt 3 port's? Tnx Bert

1  
answer

Answer this Question

Belkin Support · 9 days ago

Hi, Bert. Since your EIZO display already supports a Display port, you can connect it directly to the DisplayPort of the Thunderbolt 3 Express Dock. While your new iMac 2017 will be connected to one of the Thunderbolt 3 (USB-C) ports.

JayLarin · 11 days ago

Can I connect Thunderbolt2 Apple Cinema Display using USB-C to Thunderbolt2 addapter AND HDMI Display using DisplayPort-to-HDMI cable ?

1  
answer

Answer this Question

Belkin Support · 9 days ago

Hi, JayLarin. Both setups are possible. However, as for your Apple Cinema Display, you have the option to use a Thunderbolt 3 (USB-C) to Thunderbolt 2 adapter so you can maximize the Thunderbolt 3's transfer speed.

thisiswhoiam · 11 days ago

How long is the included cable?

1  
answer

Answer this Question

Belkin Support · 9 days ago

Hi, thisiswhoiam. The Belkin Thunderbolt 3 Express Dock comes with a 3.3-foot / 1-meter Belkin Thunderbolt 3 Cable.

Helpful? Yes · 0 | No · 0 Report

TechRider · 15 days ago

When I want to 'undock' my MacBook, can I just pull the Thunderbolt 3 cable without an error message, or do I need to 'eject' the dock? If I have to 'eject' the dock, do I also have to 'eject' any other storage peripherals plugged into the dock first?

2  
answers

Answer this Question

Belkin Support · 10 days ago

In addition, you have the option to eject any other storage peripherals before disconnecting the Thunderbolt cable on either the dock or from your computer. Also, if the Mac machine is on or in sleep mode when you reconnect the dock you will need to restart your Mac once the dock is connected to use the dock.

ALINEFX · 24 days ago

1  
answer

What version of Displayport does this support? Is it DisplayPort 1.4 capable? Would I be able to pass through a 4K 3840x2160 HDR 10-bit Signal to a Dell UP2718Q monitor with this?

Answer this Question

Belkin Support · 16 days ago

Hi, ALINEFX. The Thunderbolt 3 Express Dock HD only supports up to DisplayPort 1.2. It would pass through a 4K 3840x2160 HDR 10-bit Signal but to Mac OS running Sierra or later.

Yuyankey · 17 days ago

Hi there Can I use this product for Bootcamp Windows10 on MBP2016.

1  
answer

Answer this Question

Belkin Support · 17 days ago

You can't, Yuyankey. The Thunderbolt 3 Express Dock is compatible to work with MacBook Pro (2016) running on Mac OS Sierra or later.

Helpful? Yes · 0 | No · 0 Report

Ricwest · 18 days ago

Why wont this pass ethernet?

1  
answer

Answer this Question

Belkin Support · 18 days ago

Hi, Ricwest. The Gigabit Ethernet port of the Thunderbolt 3 dock should work. If you have connected your router to the Gigabit Ethernet port and your MacBook won't grab any internet connection on the Thunderbolt 3 port, get in touch with us at [BelkinCares@belkin.com](mailto:BelkinCares@belkin.com) so we can further assist. Please email us your contact information with the link to this post.
